Mercury 4str Outboard engine Splash covers

Dear Mercury Distributor, Dealer,

Protect your 4stroke engine cowl during boating

In addition to the existing Mercury branded outboard covers produced by Attwood(*) - which are protecting your outboard cowl during towing and storage - Brunswick Marine in EMEA is launching a new range of outboard Splash covers. A Splash cover protects your engine from stones, fishing lures, sinkers and general cowl wear and tear. It is designed to protect your engine outboard cowling during use and is made from UV stabilized, water resistant Polysoft Polyester with felt like backing to avoid scratching the gel coat of the outboard.

Product features

- Designed to protect outboard engine cowling during use
- Fully functional cover with breathable mesh venting
- Breathable, marine grade fabric and materials
- Increases resale value potential
- Prevents accidental damage
- Further reducing the already low noise values of Mercury engines
- Custom fit and having original signage
- Available in individual horse power rating for the most common categories

(*) For more information on Attwood products, please visit www.attwoodmarine.com
